

# Our priorities for 2023-24

Each year, we produce a workplan to address our key priorities and issues. This is identified through engagement and feedback received to ensure that project work reflects what matters the most to people in Lancashire.

Spring

**Waiting for wellness:** We will explore people's experiences of mental health, including the availability and quality of mental health services in Lancashire.

Summer

**Enter and View:** We will continue our enter and view programme across 5 service areas: Maternity services, Mental health rehabilitation, GP practices, Care homes and day services for adults.

Autumn

**Experiences of the deaf community:** We will speak to people who are deaf or have hearing impairments to uncover challenges faced and any barriers in accessing services and support.

Winter

**Supporting Carers:** We will engage with carers for people with Dementia and other neurological conditions to understand challenges faced and support available in Lancashire.
